

## 1. Production Equipments for HbA1c (Hemoglobin A1c) Test Kit

HbA1c is a form of hemoglobin used primarily to identify the average plasma glucose concentration over prolonged periods of time. It is formed in a non-enzymatic pathway by hemoglobin's normal exposure to high plasma levels of glucose.

Glycosylation of hemoglobin has been implicated in nephropathy and retinopathy in diabetes mellitus. Monitoring the HbA1c in type-1 diabetic patients may improve treatment.

We can supply various kind of production equipments for HbA1c test kit as per customer's needs and required specification.
