

5. Rotary Slitter : RCG-100

1) Description

RCG-100 is designed to cut a wide range of glucose test strip products from product development to production quantities.

They are manufactured with high quality components for outstanding performance and very low maintenance.

2) Characteristics

2-1) Output chute is ionized to be static free

2-2) Knife head can be changed easily.

2-3) Titanium coated blade ensures high durability

2-4) According to operator's need, chute or tray can be adopted

- Collection tray provides for easy and orderly collection of strips.

- Defective strips are easily identified for removal

- Chute provides for easy bottling

3) Specification

3-1) Capacity : 1200 rows/hour based on 3 second interval feeding

3-2) Length of row : Max. 280 mm

3-3) Width of row : Min. 25 mm

3-4) Card Feeding Method : Manual

3-5) Size : 682(L)×410(W)×365(H) mm

3-6) Weight : 86 kg

3-7) Power : 110 or 230 Volt, 50 or 60 Hz
